How do we teach HHD? Personalized Training

How do we teach HHD?- Self- cannulation

Tandem hand holding

Tip insertion- patient threads

Buttonhole technique

Types of Home Hemodialysis

- Nocturnal
- Short Daily
- Conventional
- A combination of all three
- Hybrid Hemo/PD combination
- Nocturnal independent In-Centre
- Nx Stage Cyclor or AK 96

NxStage or AK 96

NxStage

- Need to dialyze at least 4-5 days a week
- BPS > 300ml/min
- More portable
- No renovations
- Uses less water (60L)

Baxter AK 96

- Can run conventional
- BPS > 200ml/min (for nocturnal or extended dialysis)
- Stationary
- Electrical and plumbing renovations
- Uses 400L per conventional run

Top Myths of Home Hemodialysis (HHD)

Patients need a partner

Double amputee, managing alone

Set-up too complex

It's not safe!

For Nocturnal patients- to protect arm from blankets etc.

Fluid detector placed at water source and under dialyzer to alert patient to leaks

No Small Spaces and Renters

MYTHBUSTERS

No small spaces or renters

No renovations
required for
NxStage machine

(This option is
great for renters)

No HHD in remote communities

Home in Bella Bella

No HHD in remote communities

“Non-compliance”

No patients with disabilities

24 Hours a Day

Home to unstable

- Self-Care Units in BC
- Homeless patients
- Do not want dialysis in their home
- Patients who need adjustment time
- Patients afraid of being alone

There is a cost to patients

All renovation
costs covered by
BCPRA

No septic systems or well water

Septic systems and wells are OK---- Port-a-potty probably not
